## Did You Know?

Cascadia College and EvCC's Corporate & Continuing Education Center have partnered together to offer courses and certificates to individuals who live and work in the cities of Bothell, Mill Creek, Woodinville, Kirkland, Redmond, and surrounding areas.

**We have over 70 courses offered at Cascadia College located in Bothell this winter.**

Individual courses and certificates are offered in the following topics:

- Aerospace & Manufacturing
- Business & Professional Development
- Computer & Information Technology
- Personal Interest

**Bothell courses are listed throughout the schedule with a gray box. Below is an example of what a course looks like with two separate locations.**

## Meet Your Instructor

William (Bill) Latham

- Inventory Management Essentials, pg. 5
- Principles of Operations Planning, pg. 5
- Principles of Manufacturing Management, pg. 5

Mr. William F. Latham, CFPM, CIRM is an educator, trainer, seminar presenter and management consultant with experience in implementations and customer support for customers around the world. His rich and diverse professional experience provides a solid foundation for understanding business and manufacturing processes. With over 28 years of hands-on experience as a practitioner in Purchasing, Production Scheduling and Materials Management, Bill has attained a high level of expertise.

One of the APICS nationally recognized "Master Instructors," Bill has demonstrated a mastery of the training and education process. He brings his knowledge of a broad range of manufacturing environments and industries to his classes, seminars and clients.

## Meet Your Instructor

**Gary Hills**

**• Project Management Essentials, pg. 18**

**• Project Planning & Scheduling Techniques, pg. 18**

Gary B. Hills, PMP is a project management professional with over 30 years of project management experience in business, acquisition, engineering, test and evaluation, and education. Over the past 15 years, he has taught essential project management principles to students and corporate managers from around the world in assorted classroom, seminar, and distance learning formats.

Gary is a highly qualified professional who can apply practical project experience to any organization or activity. His diverse work experience spans a wide variety of career assignments to include program management, project management, aircraft acquisition, risk management, strategic and operational planning, systems engineering, flight test engineering, and test and evaluation management. He has served as a key member in many project and risk management teams and has played a major role in implementing government acquisition reform initiatives in several key government programs. He is well versed in government processes and understands the administrative and technical sides of business, project, and program management.

## Soldering and Inspection Certifications

### Lead Free Hands On Soldering Training and Assembly (1.6 CEUs)

This course is designed to provide basic knowledge needed for entry-level opportunities in the electronics manufacturing industry including new hire training. Topics include an introduction to basic electronic assembly including mechanical assembly, safety & ESD, component identification, common industry terms and definitions and basic hand soldering skills development. Course is 40% lecture and 60% hands-on exercises. Certificate granted upon successful completion of all modules. Each module includes comprehensive testing and grading of workmanship skills. A soldering kit will be completed in class. Fee \$330

### Wire and Cable Harness Assembly with IPC/WHMA-A-620 Certification (4.0 CEUs)

This combined course will develop or enhance skills needed in the field of Mechanical Assembly and Cable Harness manufacturing. Course topics include cable and connector identification, crimping, interconnect requirements, splicing, wire preparation and tinning, cable dressing and retention, routing requirements, marking, identification, and cable testing. The IPC/WHMA-A-620 certificate, which has become the most important process, materials and inspection standard for the cable and wire harness industry. Developed with support of the Wire Harness Manufacturer's Association, this standard has earned an international reputation as the source for end-product acceptance and includes lead free for terminal soldering criteria. The CIS program provides individuals

with a portable credential that represents their understanding of IPC/WHMA-A-620, and offers recognition, legitimacy and value throughout the electronics industry. This training focuses on what line workers, operators, inspectors and buyers need to know to inspect or make acceptance/rejection decisions for wire harness and cable assemblies. Fee \$895

### IPC-A-610E CIS Certification (2.4 CEUs)

This internationally-recognized certification to inspect completed printed circuit board assemblies is officially recognized by the Department of Defense and is often used as a prerequisite when hiring for positions in electronics manufacturing. Learn to determine what is an acceptable or defect condition on a printed circuit board. Additional topics include: tin lead and lead-free assembly processes, Plated Through Hole (PTH) and Surface Mount (SMT) Assemblies, and class 1, 2 & 3 levels of manufacturing. IPC Certification granted upon successful completion of the training. Certification is valid for two years. One copy of an IPC-A-610E Manual included. Fee \$545

ITEM 9147-B454	K. KUHN	CCEC-Everett, 116

### IPC J-STD-001 Certification (3.2 CEUs)

Certification in this industry-developed and approved hands-on training and certification program helps enhance employee skills and performance in high tech, aerospace and medical electronics manufacturing. The Certified IPC Specialist (CIS) program provides individuals with a portable credential that recognizes their soldering skills and understanding of this internationally recognized standard. Certification is valid for two years. Course fee covers: classroom and laboratory training, a written exam, skills evaluation, a copy of the standard and registered certification with IPC.

Previous Soldering Experience or Certification class required. Fee \$725

## CATIA v5

### CATIA V5 Boot Camp (2.5 CEUs)

Obtain the fundamentals of CATIA V5 in four days in the "hybrid" training method that combines instructor-led with web-based training. You will meet over two weekends in classroom with an instructor. Supplement your in class with access to the online simulation software.

Boot Camp includes the first five classes recommended for those new to CATIA:

- Intro to CATIA V5
- Assembly Design Fundamentals
- Sketcher and Auto-Constraints
- Part Design Fundamental
- Part and Product Integrations

Students enrolled in the Boot Camp will receive two years of access to the online simulation. Fee: \$2,945

# CATIA V5

## CATIA V5 Online "Package" (4.0 CEUs)

Study CATIA online at your own pace in the comfort of your home or work setting. The curriculum is web-based and includes video demonstrations and interactive lab exercises using the CATIA simulation program. You can enroll and start a class at any time. You have 90 days to complete the five course package and 21 days to complete an individual course. If you are new to CATIA you may wish to enroll in this "Online Package" which includes the first five classes, for a saving of \$200! Fee \$1,875  
ITEM 8923-B453 K. RILLOS Online

## CATIA V5 Introduction to CATIA (.8 CEUs)

This course familiarizes the student with the organization of CATIA V5. The student will learn how to search for information in the CATIA V5 environment using the On-Line Documentation. The student will learn to use the tools needed to examine, graphically manipulate and annotate objects for analysis. Solid model and assembly (parts and products) functions such as Tools+Customize, Edit-Links, Scan, and Renamed Views will be used frequently. After this course, students will have a solid foundation for later courses and exercises. Fee \$415  
ITEM 8930-B453 K. RILLOS Online

## CATIA V5 Assembly Design Fundamentals (.8 CEUs)

This course provides the designer with the tools needed to create and manage assemblies and sub-assemblies in CATIA V5. Topics include introduction to Assembly Design, Assembling Components, Flexible Assemblies, Analyzing and Modifying an Assembly, Designing in Context, Inserting parts from the Catalog Browser, and Properly saving Products (Assemblies) in the CATIA environment. Fee \$415  
ITEM 8931-B453 K. RILLOS Online

## CATIA V5 Sketcher & Auto-Constraints (.8 CEUs)

This course provides the student with the tools needed to build simple and complex profiles in the sketcher workbench of CATIA V5. Users will learn generic processes for auto and manually constraining profiles. The students will gain an understanding of the general concepts of and best process for fully constraining a profile. The student will learn how profiles affect Part Design and Generative Shape design workbenches Fee \$415  
ITEM 8932-B453 K. RILLOS Online

## CATIA V5 Part & Product Integration (.8 CEUs)

This course expands the student's understanding of parts and assemblies as they pertain to the CATIA product hierarchy. CATIA V5's basic product philosophy mandates a mono-detail dataset rule. This is to say that a single document should contain only one detail level part design; Part Design, Generative Shape Design or Wireframe and Surface Design product. Students will learn important tools and techniques for working with product hierarchy. Fee \$415  
ITEM 8934-B453 K. RILLOS Online

## CATIA V5 Drafting Fundamentals (.8 CEUs)

This course provides the designer with an in-depth understanding of drafting in CATIA V5. The course covers drafting view creation, text, dimensions, GT/T, title block and border creation, the filtering of drawing assembly views, inserting a bill of materials, importing dimensions from Sketcher, how to properly save and print new drawings. Flatten out (Unfold) a Sheet Metal Part onto a drawing, and Customize Default Values. Fee \$415  
ITEM 8935-B453 K. RILLOS Online

## CATIA V5 Assembly Design Advanced (.8 CEUs)

This course continues from where the Assembly Design Fundamentals course left off. Topics include: Managing the Catalog Browser, Searching for and inserting Parts from the Catalog Browser, Learn how to use the Assembly features Toolbar, Inserting existing Products (Sub Assemblies) into the Product, Learn how to use the Constraint Creation Toolbar, Create Stored Scenes for the purpose of "filtering off" parts and assemblies, Analyzing assemblies for interfaces and clearances and material properties, Properly saving New Products, Sub-Assemblies and Parts. Fee \$415  
ITEM 8938-B453 K. RILLOS Online

## CATIA V5 Wireframe Fundamentals (.8 CEUs)

This course provides a basic understanding of the skills needed to use CATIA V5 Wireframe. The basics of Wireframe (Points, Lines, Planes, Axes Systems, Splines, Connect Curves, and Curve Analysis within the Wireframe and Surface Design Workbench) are demonstrated and explained. Fee \$415  
ITEM 8970-B453 K. RILLOS Online

## CATIA V5 Introduction to Surfacing (.8 CEUs)

Equipping students with the basics of general surface and supporting wire frame construction is the goal of this course. Wire frame geometry consists of lines, circles, splines and points and is usually used in support of solids and surfaces. Surfaces are created primarily for use with solids, but many times are used for defining contoured areas in space as stand-alone entities. Students will learn how to create extruded, loft, swept and revolution surfaces. Fee \$415  
ITEM 8936-B453 K. RILLOS Online

## CATIA V5 Surfacing Operations (.8 CEUs)

Surfaces are usually not complete unless operations are performed to finalize them. Operations include Join, Extrapolate, Boundary, Trim and Split and are typically used to complete the finishing touches on surfaces that previously did not connect or that are to be used in the creation of solids. This course will expand on the students' knowledge of surfaces by employing operations to create final surfaced products. Fee \$415  
ITEM 8937-B453 K. RILLOS Online

## CATIA V5 Functional Tolerance & Annotation (.8 CEUs)

One of the most desirable goals for any industry (let alone the engineering industry) is to become a paperless environment. This course will take students one step closer to that concept by demonstrating how text and geometrical dimensioning and tolerancing (GDT) can be applied to solid geometry in space. 2 dimensional support planes are added followed by the necessary annotation to support production without the need to generate drawings. Prerequisites: V5 Assembly Design Fundamentals, Part Design Fundamentals and Wireframe Fundamentals. Fee \$415

## Lean Six Sigma Green Belt Certificate

### Lean Practices Overview (.35 CEUs)

This class provides participants with a basic understanding of Lean principles, and how they are applied to the workplace. Lean is a systematic management approach designed to improve the production process, and enhance the method of providing a product or service to a customer in the shortest time at the lowest cost. Lean focuses on reducing or eliminating the eight types of waste, which commonly account for 95 percent of the total process time. Course content provides an introduction to the Lean system, including Lean tools such as: Just in time, Kanban, Standard Work, 5s and 5 Whys. Class is taught by a Six Sigma Black Belt instructor. Fee \$105

ITEM 9015-B454	N. NAVARRO, MBA	CCEC-Everett, 109
1 Wednesday	Apr. 1	5:00 - 8:30PM

### Basic Statistics for Continuous Improvement (.12 CEUs)

Many students wanting to improve their process improvement skills using the Six Sigma methodology can become intimidated by the math and statistics required by this data analysis tool. This course will provide high-level, hands-on training of how statistics are used in Six Sigma, including what statistics are, how they are generated and interpreted, how they are used in process control, how they are used to compare before and after process improvements, and how they are shown using graphs and charts. Very basic algebraic equations will be reviewed as needed to provide the context for the statistical introduction. Bring a basic electronic calculator to class. Required textbook: Mark J. Kiemele, Stephen R. Schmidt, and Ronald J. Berdine, *Basic Statistics: Tools for Continuous Improvement*, ISBN: 978-1880156063. Course taught by a Six Sigma Master Black Belt. Fee \$290

### Lean Six Sigma Green Belt - Advanced (1.8 CEUs)

Building on the Six Sigma Green Belt Foundations course, Advanced Topics introduces more concepts, tools and techniques for the phases of a Six Sigma improvement initiative, namely strategy, deployment and execution of a Six Sigma DMAIC project. Learn best practice approaches that can be applied immediately in your work. Enhance the understanding of the DMAIC (define, measure, analyze, improve and control) approach with additional concepts related to quality principles and systems, strategy, process management, lean principles in the organization, team management and best practices for continuous improvement. Prerequisite: Lean Six Sigma Green Belt-Foundations. This course completes the coverage for the American Society for Quality (ASQ) Body of Knowledge. Class is offered in partnership with Ceptara and is taught by Ceptara Six Sigma Black Belt instructor. Fee \$380
